DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 5/27/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Pats. 6,602,702, 6,680,206, and any patent granted on Application Number 10/427/744 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

- 2. Claims 1-36, 39, and 173-174, now renumbered as claims 1-39, are allowed.
- 3. The following is an examiner's statement of reasons for allowance: the closest prior art of record fails to disclose or teach a system for detecting an analyte in a fluid comprising a light source, a detector, a sensor array comprising 1) a supporting member having a plurality of cavities and 2) a cover layer, and a plurality of particles positioned within the cavities, wherein the particles produce a signal upon interaction with analyte and the cover layer inhibits dislodgment of the particle from the cavity. Further, the cover layer is positioned such that a channel is formed between the supporting member and cover, and fluid passes through the channel. The light source illuminates an upper surface of the sensor array, such that light illuminates 2 or more cavities.

Claims 1-36, 39, and 173-174, now renumbered as claims 1-39, are thus novel and unobvious over the cited art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 1-36, 39, and 173-174, now renumbered as claims 1-39, are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kartic Padmanabhan whose telephone number is 571-272-0825. The examiner can normally be reached on M-F (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le can be reached on 571-272-0823. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
